## LESSON 2 - OPTIONAL ACTIVITY

## HERE'S THE CHALLENGE

You will need notebook paper, a pen or pencil, your Bible, and a science book.

- 1. Choose the section of the Bible/Science chart that applies to the area of science you are studying in school or have most recently studied—biology, physics, or any of the components of earth science (hydrology, geology, astronomy, meteorology, etc.).
- 2. Look up the verses and write a verse summary for each as to how it relates to that area of science.
- 3. Use the index in your science book to locate these same topics in the science text.
- 4. Compare. Is what the science text says in line with what the Scripture says?
  - a. Put a check mark ( $\checkmark$ ) beside each verse summary that your science text agrees with.
  - b. For any verses that the science text does not support, note how they disagree. Does the science text provide evidence to support its claim?
- 5. What conclusions can you draw from this exercise?

Psalm 119:9-10

How can a young man cleanse his way? By taking heed according to Your word. With my whole heart I have sought You; Oh, let me not wander from Your commandments!
